AI-alapú áttekintés

Developers using Google AI Studio have raised significant concerns regarding data persistence. Users have reported that supposedly deleted prompts and chat sessions remain fully accessible, functional, and processable on the backend for over 30 days after deletion, which has triggered debates over GDPR compliance and data privacy. Google AI Developers Forum +2

Below is an overview of the current community consensus, technical evidence, and Google's official deletion processes based on active developer discussions:

User-Identified Data Retention Flaws

- **Accessibility:** Developers report that marked-for-deletion chats remain recoverable via direct URLs, and continue to process user inputs or generate AI responses. Google AI Developers Forum
- **Drive Integration:** Many users note that even after deleting AI files and permanently emptying the Google Drive Trash, the underlying backend data remains stored on Google's servers. Google AI Developers Forum
